

Directly going from Colon Mode to Insert Mode is not possible

ESC Mode

- / -> Search a word ... Ex: /root
- yy / nyy – copy a line / n lines
- p / np – paste copied line / n times paste
- dd / ndd – cut / delete a line / n lines cut / delete
- u – undo changes / like ctrl+z in windows

Colon Mode

- `:/word` -> Search a word
- `:w` -> Save the changes
- `:q` -> Come out of editor / `:q!` to come out saving changes
- `:wq` -> save and quit
- `:%s/word1/word2/` -> search and replace
 - `%s/word1/word2/g` -> g is global across the line
 - `%s/word1/word2/i` -> enable case insensitivity

INSERT Mode

- Insert mode is to add / type your own content.
